Important Safety Instructions

Please read and keep all safety and usage instructions.

Warning

To prevent accidental ingestion, the headphones should be stored away from children and pets. The headphones contain lithium batteries. Swallowing them can be dangerous. If swallowed, seek medical attention immediately. When not in use, the headphones should be stored in a covered charging case and kept out of reach of children and pets.

Do not use headphones at high volume for a long time.

To avoid hearing damage, please use the headphones at a comfortable and moderate volume. First, turn down the volume of the device, then put on the headphones, and gradually increase the volume until you reach a comfortable auditory level.

If you are making calls through this headset while driving, you should use it with caution and comply with the applicable laws regarding the use of mobile phones and headsets. In some places, laws have specific restrictions on the use of such products while driving, such as the configuration of single-ear sockets. Do not use the headphones for any other purposes while driving.

Children are not allowed to use headphones.

Do not immerse the headphones in water or expose them to a damp environment for a long time, or wear them during water sports such as swimming, water skiing and surfing.

When using this product, basic preventive measures should be followed. The specific contents are as follows

If a charging case is used near children, it must be closely monitored to prevent them from getting injured.

The charging case must not come into contact with water, rain, liquids or snow and other substances.

Using power sources or chargers that are not recommended or sold by the battery pack manufacturer poses a risk of fire or injury to personnel.

Do not use the charging box when the rated output power is exceeded.

Do not use charging cases that have been damaged or modified. Damaged or modified batteries can cause unpredictable dangers such as fire, explosion or personal injury.

Do not disassemble the charging case. Improper reorganization may lead to the risk of fire or injury to personnel.

Only qualified maintenance personnel are allowed to use the same spare parts to perform maintenance operations.

⚠ Containing small components may cause suffocation. Not suitable for children under 3 years old.

⚠ This product contains magnetic materials. Please consult a doctor about whether it will affect implantable medical devices.

Do not modify this product without authorization.

This product should only be used under the conditions of power supplies approved by relevant authorities and in compliance with local regulatory requirements (such as UL, CSA, VDE, CCC).

Do not overheat products containing batteries (for example, avoid direct sunlight and keep away from fire sources, etc.). Please wipe off the sweat on the headphones and the charging case before charging.

Trigger the voice assistant

Three-Clicks R to trigger the voice assistant.

Operating Instructions

Switch music mode and game mode

Four-Clicks L or R to Switch music mode/game mode (low latency)

Previous Song

Double Click L to switch the previous song.

Next Song

Double Click R to switch the next song.

Play/Pause Music

Click R to Play/Pause Music.

Charging Indication

Earphone Charging

Put the headphones into the charging case and close the cover to charge them. It takes about 1 hour to fully charge the headphones.

During charging, the self-light of the headphones remains on constantly and the white light goes off when fully charged.

Case Charging

Charge the charging case with a Type-C data cable. During charging, the indicator light in the case remains white constantly on. When fully charged, the white light goes out.

Pairing Method

When both ears are turned on, they automatically enter the pairing mode. During pairing, the blue and white lights on both ears flash. After pairing, the blue and white lights on the main ear flash and the lights on the secondary ear go off.

Device Pairing Connection

The phone searches for the pairing name **Cub(IEM)-TWS**. Perform connection and pairing. There will be a prompt sound for success, then the lights in both ears went out.

Environmental Protection Requirements

| Names of hazardous substances | Standard limit value |
|--|----------------------|
| Lead (Pb) ≤ 1000 ppm | 1000 |
| Cadmium (Cd) ≤ 100 ppm | 100 |
| Mercury (Hg) ≤ 1000 ppm | 1000 |
| Hexavalent Chromium (Cr6+) ≤ 1000 ppm | 1000 |
| Polybrominated Biphenyls (PBB) ≤ 1000 ppm | 1000 |
| Polybrominated Diphenyl Ethers (PBDE) ≤ 1000 ppm | 1000 |

Note: All must pass the relevant ROHS standard tests and have the relevant qualified test reports at the same time.
